MAGILL & CO. January 15, 1919 FARGO, N. D.

1919 PRICE LIST 1919

In presenting this first issue of our 1919 **Field Seed and Seed Grain** price list, we wish to take the opportunity to thank all our old friends and customers for their past patronage. We continue to grow, and our ever increasing facilities enable us to handle the additional volume of business with the same careful attention that has distinguished "**Fargo Seed House Service**" in the past. We therefore welcome new trade connections, as well as increased favors from old customers. We beg to assure both old friends and new that our constant aim shall be to deserve your confidence by maintaining our present high standard of efficiency as to **QUALITY** and **SERVICE**.

Our old customers are well acquainted with our standards of quality and methods of doing business, but to our new and prospective customers we want to say that, since our firm was first organized it has been our one great ambition to promote the interests of Agriculture throughout the Northwest and to offer only such varieties of seeds as we know will do well and are best adapted to your climatic conditions.

We have labored incessantly to help produce and offer to the trade improved varieties of seed grain, grass seeds and seed corn, and we do feel that these new varieties together with the general high standard of quality which we know is represented in every shipment which we make, have been in a large degree reflected in the continued prosperity of the Northwest.

We have been in the seed business for 32 years and have built up our large volume of business through the reputation which follows the furnishing of **GOOD SEEDS**.

Samples.—We furnish samples of our seed grain and field seeds, free of charge, to prospective buyers on request. When orders are placed from samples please give us approximate date you received the sample; also stock number.

The North Dakota Seed Law is one of the most strict of any in the United States, and as we are located here at Fargo under the very shadow of the **State Control Seed Laboratories**, our stocks are at all times subject to the most rigid inspection and it is our ambition that every shipment be of even higher quality than that prescribed by our **State Pure Seed Law** and **Department of Federal Control**.

No Warranty.—We exercise extreme care in the filling of all orders, but we give no warranty, expressed or implied, as to quality, description, or productiveness, or any other matter of any seeds we send out, and will in no way be responsible for the crop.

This non-warranty is similar to that used by all seed houses and we recommend that you test seeds on arrival and if they do not meet your requirements return them at once at our expense and we will cheerfully refund your money.

Order Early.—As market conditions are very unstable again this season, and as fancy stocks are going to be hard to replace, we strongly recommend that our customers place their orders early, thereby taking advantage of the low prices which we present in this issue of our 1919 price list.

Prices Subject to Change.—The prices quoted herein are based on market conditions at the time this list is issued and are subject to change without notice.

We do not alter prices except in extreme cases, but if your list is an old one and you have occasion to presume that prices are either higher or lower, just write us for current list before ordering and we will supply one at once.

Terms of Sale.—Cash must accompany order and should be in the form of money order or bank draft, or currency by registered mail. We will accept postage on remittances of \$1.00 or less if you find it more convenient to use this method.

Orders Promptly Filled.—But in case of delay you will be notified by letter explaining cause of such delay and advising when shipment will be made.

If you do not hear from an order sent us, within a reasonable length of time, send us a duplicate stating amount of remittance, and be sure to give your name and full address.

We have again this season procured a supply of **Farmers' Record and Account Books** which are particularly adapted for the use of small farmers wishing to keep records of their year's transactions. The book also contains in addition many useful bits of information which will prove of value to every farmer, hints to automobile owners regarding care of cars and operation expense. Send for one—they are free.

Send for our booklets on Marquis Wheat, Alfalfa, and Bean Culture in North Dakota; they are free, and may help you to get started right.

Remember we are the largest shippers of Poultry Feeds and Supplies in the Northwest; heavy stocks always on hand for immediate shipment. Ask for special prices on ton lots.

HOME GROWN SEED CORN.

After having experienced the past unfavorable season corn growers in this latitude need hardly be reminded of the grave importance of procuring Northern grown seed corn for the 1919 sowing from a source known to be thoroughly reliable. The bulk of our stocks have grown from seed of our own selection and breeding, and the crops brought to maturity under our personal supervision, after which they were gathered early, kiln dried, graded and tested, and you can depend on these different varieties producing a matured crop of corn next fall if given a reasonable season with proper cultivation.

From the standpoint of a matured crop, the North Dakota and Montana seed corn of 1918 was nearly a failure, excepting in a few counties, due to abnormally early frosts. However, with our increased facilities and improved methods of handling and curing we have succeeded in saving limited quantities of this Home Grown seed, all of which will show strong germination and is sure to please thousands of most exacting customers.

You no doubt have experimented in past seasons with Southern grown seed corn and are perfectly aware of the extra hazard being taken in planting any other than the Northern grown varieties, so to you past experimenters let us appeal again this season that you do not be fooled by this seed from the Southern and Central States.

It surely looks larger, plumper and brighter than our Home Grown corn, but you know from your own observation that Southern seed cannot be brought to maturity here in the Northwest excepting on most favorable seasons. Why not eliminate the possibility of losing this most valuable of crops by the planting of our Northern grown varieties?

Don't Be Deceived by the claims of Southern and Eastern dealers that N. D. corn is not fit for seed.

We have worked on this problem for over 20 years and have demonstrated that our Home Grown Corn can be dried artificially so that it makes seed of the strongest vitality every season.

Grading.—The bulk of our Home Grown Seed Corn is grown by us under contract from seed of our own selection.

All corn is first selected at husking time, then a more careful selection is made when the ear corn goes to the driers, and once again when on the way from the driers to the shellers. Later, after shelling, the corn is graded to size and shape so that it will feed in the average corn planter to best advantage.

Testing.—All lots of seed corn are tested for germination even before the drying process commences and we continue these tests at stated intervals up to and including the time of delivery.

Try our "**Fargo Brand**" Seed Corn this year and be convinced. When shelled it comes put up in seamless bags for which we make an extra charge sufficient to cover actual cost.

NORTH DAKOTA GROWN CORN.

- Northwestern Dent.**—An 85-day Red Dent Corn, with medium kernels and average sized cob. Has a fine leafy stalk, with ears well up from the ground so it can be cut with binder. Earliest Red Dent Corn grown, and we recommend it for any part of the Northwest. Grown in Burleigh County.
 Shelled, per bushel.....\$4.00
 On Cob, per crate of 70-lbs.....\$6.00
- Northwestern Dent, Improved.**—A new variety bred up from Northwestern Dent. Distinctive features being larger ears and taller stalks. Especially recommended for Central North Dakota. Grown in Richland County.
 Shelled, per bushel.....\$4.25
- Golden Dent.**—The earliest Yellow Dent in the world. Ears grow well up. In demand with feeders for early fall finishing of cattle. Grown in Sargent County.
 Shelled, per bushel.....\$5.00
- Minnesota No. 13.**—A Yellow Dent Corn very productive and adapted for all soil conditions. Stalks grow well up, leafy, and make a fine fodder. Matures in ninety days. Raised in Sargent County.
 Shelled, per bushel.....\$3.75
 On Cob, per crate of 70-lbs.....\$5.75
- North Dakota White Dent.**—A very early variety raised in Burleigh County.
 Shelled, per bushel.....\$4.00
- White Squaw Flint.**—Very early in maturity and heavy yielder, an abundance of ears being produced close to ground which makes this variety very popular with stockmen for hogging off. Grown in Burleigh County.
 Shelled, per bushel.....\$5.00
- Gehu Flint.**—One of the earliest and most popular varieties of Flint grown. Ears are light yellow in color. With proper cultivation produces stalks six feet in height. Will mature on a normal season in 80 days and yields of 60 bushels per acre are not uncommon. Grown in Burleigh County.
 Shelled, per bushel.....\$5.00
- Smut Nose Flint.**—One of the most popular early maturing eight-row Flint varieties. Stalks about six feet in height and ears well up from ground so can be harvested with binder. Grown in Richland County.
 Shelled, per bushel.....\$4.00
- King Phillip Flint.**—An extra early variety and one of the most reliable. Ears grow well up on stalks. Very leafy and therefore of high value as fodder.
 Shelled, per bushel.....\$4.00

Seamless Bags Extra, 65c each.

MINNESOTA GROWN CORN.

Minnesota No. 13.—The parent stock of this seed was propagated at the Minnesota Experiment Station and we have endeavored to retain the earliness and type by a constant, careful selection of seed stock. On a normal season this stock will mature in 90 days, and there is no variety which will produce a heavier yield. Grown in Redwood County.

Shelled, per bushel.....\$3.50

Minnesota 23.—An 85-day White Cap Yellow Dent Corn. Shapely ears well filled to tip and butt, especially adapted for North Dakota and Northern Minnesota soil and climatic conditions. Grown in Wright Co.

Shelled, per bushel.....\$3.75

Rustler White Dent.—A heavy yielding, early variety which is well adapted to Northwestern conditions, being especially suited to South Central North Dakota, Northern South Dakota and Central Western Minnesota. Produces large, uniform ears which are closely filled with deep white kernels. The stock which we offer was awarded first premium at the Redwood County Fair in which county it was grown.

Shelled, per bushel.....\$3.50

On Cob, per crate of 70-lbs.....\$5.50

Northwestern Dent.—A variety which is generally conceded to be the earliest and hardest Dent grown and can be relied upon to produce a larger yield of better and more evenly matured corn than any of the other early maturing varieties. We can especially recommend this stock to the Northern farmer who is looking for a heavy tonnage of nutritious fodder as well as an abundance of matured grain. Grown in Wright County.

Shelled, per bushel.....\$3.50

Mercer Flint.—A magnificent extra early yellow variety, heavy yielder producing ears about three feet from the ground on a very leafy stalk seven feet in height, making this one of our most popular of the early maturing fodders. Grown in Wright County.

Shelled, per bushel.....\$3.75

Pop Corn—White Rice.—Choicest of rice shaped pearly white kernels, the most satisfactory of our early maturing, heavy yielding varieties for Northwestern conditions.

Shelled, per bushel.....\$7.00

Pop Corn—Japanese Hull-less.—This variety makes about 40% more bulk when popped than other varieties.

Shelled, per bushel.....\$13.00

ALL PRICES F. O. B. FARGO OR MOORHEAD

FODDER CORN—ALL SOUTHERN GROWN.

The sowing of fodder corn has become almost universal as it provides an excellent forage crop, producing more tons of feed per acre than any other grain or grass. Can be sown late in the season when other forage crops are a failure. The varieties which we offer below are especially adapted for Northwestern conditions. Our present stock has been carefully selected, cured and tested, resulting in the choicest of quality and strong germination. Order early if you want some of this extra choice seed.

Mammoth Yellow Dent Fodder.—Makes heavy tonnage of excellent quality fodder—high in food value, as soft ears are formed and stalks become well cured.
Per bushel.....\$2.00

Mammoth White Dent Fodder.—Produces results similar to the yellow fodder variety. Very leafy and easy to harvest.
Per bushel.....\$2.00

Sweet Fodder Corn.—Produces abundance of choice quality fodder which is high in sugar content, of special value for feeding to dairy stock. Per bu. of 45 lbs.....\$4.25

Sugar Cane.—Makes one of the very best crops of fodder when drilled with ordinary grain drill at rate of 50 lbs. to acre; produces sweet, tender fodder, which is of high food value for cattle, horses and hogs, either as roughage or silage. Every Northwestern farmer should grow some as it is a great drought resister and sure to provide a heavy tonnage of choice feed even with a rainfall way below normal.
Per 100 lbs.....\$5.00

Kaffir Corn.—Is constantly growing in favor with our Northern farmers. When drilled in rows produces abundance of hay from 5 to 6 feet in height with broad leaves. Easily grown and makes one of the best fodders for horses and cattle when harvested just as it begins to tassel. Per 100 lbs.....\$4.75

Sudan Grass.—A new annual forage crop of immense value to the West. It resembles Sugar Cane, but grows a finer stalk, and reaches a height of 7 to 9 feet. Sow 4 to 6 pounds of seed per acre in rows 18 to 24 inches apart, or drill 15 pounds per acre. One of our best drought resisting forage crops—heaviest yielding of any hay crops as it can be harvested from two to three times per season. Per 100 lbs.....\$17.00

Seamless Bags Extra, 65c each.

SEED & GRAIN.

- Blue Stem Wheat, Minn. No. 169.**—Plump, heavy wheat. Per bushel.....\$2.50
- Marquis Wheat.**—A variety of hard spring wheat which was originated by crossing the Red Fife with acclimated Calcutta Red, thereby combining the early maturing features of the former and exceptional qualities and appearance of the latter, beardless, heavy yielding, and one of the earliest maturing varieties of hard wheat known.
Per bushel.....\$2.50
- Velvet Chaff Wheat.**—A very early, large yielding variety of bearded wheat which ripens one week earlier than Fife or Blue Stem. Per bushel.....\$2.45
- Arnautka Durum Wheat.**—Drought resisting, not as easily affected by rust as some other varieties. Choice selected seed.
Per bushel\$2.50
- Scotch Fife Wheat.**—Choice seed raised on new land in North Dakota. Weighs 60 lbs. per bu. Per bushel.....\$2.50
-
- 60-Day Oats.**—One of the earliest varieties we have been able to produce. Sow early for best results. Per bushel\$0.95
- Swedish Select Oats.**—A very popular early variety, heavy yielder under all soil conditions. Per bushel\$0.95
- White Russian Oats.**—A late side oat, very free from rust. Per bushel.....\$0.95
- Big Four Oats.**—Heavy branching, good yielder. Per bushel.....\$0.90
- Silver Mine Oats.**—Early, heavy yielding.
Per bushel.....\$0.90
- Norway Oats.**—A new variety, claimed to be rust-proof. Straw bright and fine for winter feed, medium early and heavy yielder.
Per bushel.....\$1.35
- Early July Oats.**—1918 crop cut July 10th, yielding 50 bushel per acre. A winter variety brought to the Northwest from south of the Mason and Dixon line, which has been grown here in Cass County, North Dakota, in a small way for four seasons past. By sowing very early in the spring ripens even ahead of the 60-day variety and the earlier varieties of barley, so is of high value as a harvest feed. Heavy yielding—early spring frosts do not injure the young plants. Per bushel.....\$1.45
-
- Oderbrucker Barley.**—An extra choice barley, perfectly pure, six row, stiff straw, very heavy yielder. Per bushel.....\$1.15

ALL PRICES F. O. B. FARGO OR MOORHEAD

- Manshury Barley.**—Choice, bright, heavy yielding, six row barley. Per bushel.....\$1.10
- Wisconsin No. 5 Barley.**—Best 6-row barley produced at Wisconsin Experiment Station. Noted for its plumpness and uniformity of grain, stiffness of straw and vigorous growth. Per bushel.....\$1.15
- Chevalier 2-Row Barley.**—Heavy yielding variety which is growing in popularity here in the Northwest as it is very hardy and consistently outyields—even on dry seasons—many of the other sorts. Usually demands a market premium as the grain is plump, heavy and bright. Our supply this season is North Dakota grown and of good quality. Per bushel.....\$1.15
- Hulless Barley.**—This variety of barley is very popular with stockmen as it is both beardless and hulless. Weighs 60 pounds per measured bushel and is an enormous yielder; straw makes excellent hay. Per bushel.....\$1.60
- Speltz.**—Farmers in the Northwest cannot afford to be without it. It produces a good yield under adverse conditions, even where other crops often fail. It will stand more dry weather than any other grain crop, as it is a good drouth resister. It produces more food value per acre than any other of our grains and is a most valuable feed for all kinds of stock. The plant is almost entirely free from rust and smut and does not lodge. Per bushel.....\$1.25

(Flax not guarantee free from mustard.)

- Pure Russian Flax.**—Choice seed raised on new land. Per bushel.....\$4.00
- Primost Flax No. 25.**—One of the best varieties produced by Minn. Exp. Station and is pronounced by this same authority as the heaviest yielding variety which they have been able to produce. Per bushel.....\$4.15
- N. D. No. 114 Flax.**—It is a hardy, good yielding strain. Its strong points are its capacity for yield and grade. Distinctive features being a small brown seed, one of the surely resistant varieties which is best adapted for heavy soil conditions in Red River valley. Per bushel.....\$4.50
- North Dakota Resistant No. 52 Flax.**—This variety was bred up by Prof. H. L. Bolley of the N. D. Experiment Station for a wilt resistant variety. He commenced work on it in 1900 and first put the seed in farmers' hands, in small quantities, in 1908. This is the sixth year we have been able to secure any of it to offer to our customers and the supply is limited. Per bushel.....\$4.25

Seamless Bags Extra, 65c each.

Spring Rye.—North Dakota grown stock of good quality. Per bushel.....\$2.25

Winter Rye.—Makes excellent pasture when sown in spring. Per bushel.....\$2.00

New Rosen Winter Rye.—An exceptionally hardy, vigorous growing variety which originated in Russia. The kernels are large, plump and of grayish white color with heads filled uniformly to the tip, tall stiff straw which is not subject to lodging or rust. is of special merit on account of its productiveness, yielding enormous returns even on light soil. Try some of this new variety and be assured of a bumper crop....**Ask for prices.**

Buckwheat.—Can be seeded very late and is of great value as a catch crop as it is often sowed in July; highly recommended to turn under when green; it smothers weeds and is fine for fertilizer. Per 100 lbs.....\$4.40

Hog Pasture Mixture.—This mixture is made after a formula furnished by Government Experiment Station; produces abundance of highly nutritious pasturage. Per 100 lbs.....\$6.00

Dwarf Essex Rape.—Furnishes an immense amount of green feed, and its nutritive value is nearly twice that of clover. It may be sown any time from early spring until late in summer, with grain or alone. From 5 to 10 lbs. of seed per acre is sufficient, less if sown with grain. Per 100 lbs.....\$11.00

Canada Field Peas.—Make excellent feed for horses, sheep, hogs and milch cows; equal to corn and a month earlier in maturity. Sow either alone or with oats or barley. Per bushel.....\$4.25

Marrowfat Field Peas.—Very productive, rich cream color and Northern Minnesota grown. Per bushel.....\$5.00

Hemp Seed.—Being grown in the Northwest for fibre it should be seeded at about 30 lbs. per acre. Fine soiling crop and produces such a dense foliage that authorities recommend this crop in eradicating quack and other noxious weeds. Per 100 lbs.....\$20.00

Winter Vetch.—Is one of our most valuable legumes which brings an enormous amount of fertility to the soil and provides fine pasturage. Per 100 lbs.....\$23.00

White Navy Beans.—Choice hand picked straight variety stock grown in North Dakota. Per bushel.....\$6.50

Great Northern Beans.—A pure white, kidney shaped bean of the most pleasing flavor. Very early in maturity and heavy yielder. Stock grown in Montana and is very choice. Per bushel.....\$6.25

MILLET.

Millets of all varieties should be sown in North Dakota after June 1st, for best results.

Golden Millet. —Home grown.	Per 100 lbs..	\$5.50
Golden Millet. —Southern.	Per 100 lbs.....	\$6.00
White Wonder Millet. —A new variety which is rapidly growing popular here in the Northwest, distinctive features being its early maturity, heavy leafy foliage, thus producing immense amount of desirable fodder which is easily cured. Its dense growth makes it possible for this crop to easily conquer noxious weeds.		
	Per 100 lbs.....	\$8.00
Common Millet. —Home grown.	Per 100 lbs	\$4.25
Siberian Millet. —Home grown,	per 100 lbs....	\$5.00
Siberian Millet. —Southern,	per 100 lbs.....	\$5.50
Early Fortune Millet. —Home grown.		
	Per 100 lbs.....	\$4.50
Hog Millet. —Home grown.	Per 100 lbs.....	\$4.00
Japanese Millet. —Grows very rank and produces an immense yield of coarse hay.		
	Per 100 lbs.....	\$7.50

POTATOES.

(Burlaps extra 16c each)

Early Ohio Potatoes. —Pure stock, hand sorted.	Per 100 lbs.....	\$1.75
Early Six Weeks Potatoes. —A very choice variety, much like the Early Ohio but earlier and more productive.		
	Per 100 lbs.....	\$2.00
Rural New Yorker Potatoes. —A heavy yielding white variety; hand sorted.		
	Per 100 lbs....	\$2.00
Irish Cobbler Potatoes. —Heavy yielder; in demand by Southern seed trade. Early and hand sorted.		
	Per 100 lbs.....	\$2.10

PARIS GREEN—ANSBACHER BRAND.

This brand of green needs no introduction to potato growers of the Northwest, being one of the oldest and best known brands on the market. We have a supply in both bulk and package lots.

Ask for prices.

ARSENATE OF LEAD. —One of the most powerful insecticides which is increasing in popularity with potato growers; furnished in powder form, to be used as spray.		
1-lb. package.....		\$0.50
5-lb. package.....		\$2.25
10-lb. package.....		\$4.30
20-lb. package.....		\$8.00
50-lb. package.....		\$18.50

Seamless Bags Extra, 65c each.

GRASS SEED.

- Bromus Inermus.**—The great drought resisting grass for both hay and pasture. Choice seed which we recommend as quack free.
Per 100 lbs., sacked.....\$24.00
- Slender Wheat Grass.**—(Often called Western Rye Grass.) Affords excellent pasture and provides large quantities of hay; will thrive under very dry conditions on light soil; also thrives on alkali soil where other grasses fail. Per 100 lbs., sacked.....\$19.00
- Timothy.**—Choice North Dakota grown.
Per 100 lbs.....\$11.50
- Timothy and Red Clover Mixed.**—Choice Minnesota grown with sprinkling of Red Clover, just as grown together. Per 100 lbs. \$13.50
- Timothy and Alsike Clover Mixed.**—
Per 100 lbs.....\$13.50
- Blue Grass.**—Choice Kentucky, per 100 lbs. \$25.00
- Red Top.**—Solid, good for low lands.
Per 100 lbs.....\$17.00
- Orchard Grass.**—Good for shade—100 lbs. \$28.00
- Meadow Fescue.**—One of the best known of our natural or permanent meadow grasses.
Per 100 lbs.....\$33.00
- Lawn Grass Mixture.**—Our **Fargo Brand** mixture contains the choicest varieties which are particularly adapted to our Northern climatic conditions. Per 100 lbs.....\$35.00
- Medium Red Clover.**—This is a choice hardy lot of heavy dark colored clover grown in Northern Minnesota, which we recommend most highly for sowing here in North Dakota. Per 100 lbs.....\$44.00
- Mammoth Red Clover.**—Minnesota grown.
Per 100 lbs.....\$44.00
- Alsike Clover.**—Minn. grown. Per 100 lbs....\$35.00
- White Clover.**—Per 100 lbs.....\$52.00
- Sweet Clover.**—(White Flowering Biennial.)
A valuable plant for both hay and pasture, also of high value as soiling crop.
Per 100 lbs.....\$28.00
Per 100 lbs., Scarified.....\$30.00
- Yellow Flowering Biennial—**
Per 100 lbs.....\$26.00
Per 100 lbs., Scarified.....\$28.00

FARGO BRAND FANCY ALFALFA.

Alfalfa is rapidly becoming a necessary crop to every Northern farmer, and the production of seed here in the Northwest is increasing rapidly, as it is a recognized fact by all authorities that this Northern grown stock is preferable to that grown in the south central states or in Europe.

Alfalfa — North Dakota Grown.—Raised under dry farming conditions in Williams County on one of the oldest fields in the State. Choice bold seed which is very hardy.
Per 100 lbs.....\$25.00

Alfalfa.—Montana, Liscomb variety. Grown on non-irrigated land and from some of the oldest and best established fields in the state. High in purity and stock which we can recommend to our trade. Per 100 lbs.....\$24.00

Alfalfa.—American grown in either Nebraska or Idaho. Shows strong germination and high purity. Some of the best fields in the Northwest have originated from this stock. Per 100 lbs.....\$22.00

Alfalfa.—South Dakota. Grown out in the Black Hills district under dry farming conditions on old fields which have withstood many winters, so we can recommend this stock as being perfectly hardy and of highest purity. Per 100 lbs.....\$23.00

Alfalfa.—Grimm, N. D. grown. Is characterized by spreading roots instead of one main tap root; it also has a much wider crown than other varieties and is noted for its heavy stooling tendency. On account of the peculiar root formation some authorities claim it withstands winter killing. Per 100 lbs....\$40.00

SCARIFIED CLOVER AND ALFALFA SEED.

We have recently installed a scarifying machine for the treatment of Clover and Alfalfa seed containing a high percentage of what is known as "hard seed." The function of this machine is to crack and scratch the hard shell of the seed thus enabling it to more readily absorb moisture and grow the first season, when planted in the ground.

Seed treated by this process shows almost a perfect germination, and is supplied at \$2.00 per 100 lbs. over and above the foregoing prices.

Nitragin.—For Clover and Alfalfa inoculation. First quality nitrogen-fixing bacteria which makes positive a good catch the first season.
One acre package.....\$1.00
Two acre package.....\$1.80
Five acre package.....\$4.00
Ten acre package.....\$7.50

Seamless Bags Extra, 65c each.
